EDUCATION

Degree	Board/Institute	CGPA/Percentage	Year
Bachelors of Data Science and Analytics	Mumbai University	10/10	2026
Higher Secondary Education	Maharashtra State Board of Higher Secondary Education	91.8%	2023
Secondary Education	Maharashtra State Board of Secondary Education	96.60%	2021

TECHNICAL SKILLS

- **Languages & Core** : Python, C++, JavaScript/TypeScript, SQL.
- **Web & Backend**: FastAPI, Django, Flask, Node.js, PostgreSQL, SQLite, Firebase
- **AI/ML**: LLMs, Agentic AI, RAG, Prompt Engineering, NLP (spaCy, HuggingFace), Computer Vision, OCR,MCP, Vector DB's
- **Frameworks**: PyTorch, TensorFlow, scikit-learn, MLX, LangGraph, LangChain, LangSmith, HuggingFace.
- **MLOps & Deployment**: Docker, AWS, GitHub Actions, Vercel, Render, Railway, Streamlit

EXPERIENCE

Artificial Intelligence Intern , Hrita Solutions Pvt Ltd

Jan 2026- Present

- Engineered a role-based headless CRM (React/Firebase) orchestrating 7+ workflow stages, eliminating 12+ hours/week of manual coordination across teams.
- Architected an automated local-to-cloud Google Sheets sync pipeline managing 2,000–10,000 records via specialised agents enforcing schema integrity and QA — saving 12+ hours/week of manual data entry.

Artificial Intelligence Intern , Softcell Technologies Global Pvt Ltd

Jun 2025- Aug 2025

- Benchmarked MLX vs PyTorch across 3 task types (MNIST classification, TinyLlama fine-tuning, Mistral-7B inference) on M3/M4 hardware — MLX delivered 7.4x lower memory and 1.9x faster inference on Mistral; PyTorch held 45x throughput advantage on CPU classification.
- Implemented distributed PyTorch DDP across a 3-node Mac Mini cluster (M4 Pro), achieving 96–97% accuracy at ~69k samples/sec per node, establishing the team's multi-node on-device AI baseline.
- Developed an end-to-end Legal AI system for contract clause extraction and automated revision suggestions, delivering a production-ready prototype across the full analysis pipeline.
- Built a Resume-JD matching platform with LLM-based similarity scoring capable of processing 50 resumes per bulk run, reducing manual screening effort per hiring cycle.

Data Science Intern , Unified Mentor Pvt Ltd

Jan 2025- Mar 2025

- Delivered 3 end-to-end ML projects (Cybersecurity Threat Detection, IBM HR Attrition, Study Strategy Optimisation) on datasets up to 50,000 rows, achieving 90%+ accuracy across all three using XGBoost, Neural Networks, and Isolation Forest.
- Compared 7 model architectures per task; drove accuracy above 90% through hyperparameter tuning, validated via precision, recall, F1, and confusion matrix evaluation.

PROJECTS

Sentinel: Autonomous Multi-Agent Research System | [Github](#)

- Engineered a self-correcting LangGraph agent that detects and resolves LLM hallucinations via recursive feedback loops, delivering verified responses within 3–10 seconds per query.
- Designed dynamic ArXiv/Tavily routing for query-type-aware source selection; deployed production MLOps pipeline via LangSmith + GitHub Actions with full CI/CD coverage of agent logic

Vidyut Sanchay | Intelligent Power Grid Orchestrator | [Github](#)

- Architected a multi-agent procurement system (LangGraph + Llama-3) integrating live market and logistics APIs; ExtraTreesRegressor pipeline outperformed baseline by 10–20% on held-out test set.
- Reduced inference load time for 3GB+ ML models by 20–40% via Docker volume mounting, enabling consistent containerised deployment across environments.

AI-Powered Symptom Checker with Contextual Medical Memory | [Github](#)

- Engineered a FastAPI diagnostic engine achieving 85–90% symptom-to-condition accuracy with real-time risk scoring; PyTesseract OCR pipeline processes patient health records end-to-end in under 10 seconds.
- Built a React dashboard surfacing personalised health insights from unstructured medical records for non-technical users.

Context Aware Email Triage System

- Built an end-to-end FastAPI pipeline that auto-classifies, prioritises, and sentiment-scores incoming enterprise emails via IMAP integration with Gmail/Outlook, persisting results to SQLite with timestamps for trend analysis.
- Developed a live Streamlit dashboard with 10-second auto-refresh, urgency filtering, and Altair trend visualisations; automated daily digest emails surfacing top-5 high-urgency items to the team via a scheduled cron pipeline.

LEADERSHIP AND AWARDS

- First Rank In Fy Bsc & Sy Bsc (Data Science and Analytics) with highest scores in 5+ subjects.
- Collaborated and worked under Principal Income Tax Commissioner for Budget 2025 seminar in College
- CodeCrux (Event Head): Founded the college's first inter-university coding competition, managing a 12-person team from ideation to execution.
- Eureka (Event Head): Designed and ran a real-world business case study event under the R&D Department, sourcing industry-grade problem statements
